for Rehabilitation

Advanced, comprehensive care for effective results

“At the Flagler Institute for Rehabilitation, our goal is simple: reduce or eliminate your pain and help you improve your quality of life for the long term. One of the ways we achieve this goal by offering you a team of experienced therapists in many different specialties who believe in patient-first care. Another way is by offering the best of today’s advanced therapies to address your condition and help return you back to your active life. Because we believe in the value of movement, flexibility and strength as part of a healthy life, we educate, encourage and empower you to gain these benefits, as well.

“Beyond our skills, therapies and state-of-the-art facility, truly helping you means letting you know how unique and special you are to us. That’s why your Flagler team is dedicated to you from beginning to end and why you’ll feel our compassion in all we do. It’s about providing the excellent results you need and delivering them in a way that maintains your dignity, boosts your self-confidence and makes you comfortable here so you can rely on us as a resource for good health for years to come.”
